Vishal Subhash Chavan

MERN Stack Developer | Aspiring Software Engineer

Results-driven B.Tech student specializing in Computer Science and Business Systems with expertise in the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in designing scalable, user-friendly web applications. Experienced in integrating AI tools and Machine Learning for innovative solutions. Skilled in HTML, CSS, JavaScript, SQL, and Java. Actively seeking opportunities to contribute to impactful full-stack development projects while advancing technical expertise.

EDUCATION

- **B.Tech, Computer Science and Business Systems** (2022 - Present)
  Kolhapur Institute of Technology, Kolhapur, Current CGPA**: 8.61** (Expected Graduation:2026)
- **HSC (12th)** (2021-22)
  SRVM College, Jath, Percentage: **76.83%**
- **SSC (10th)** (2019-20)
  Shri Hanuman New English School, Walasang, Percentage: **93%**

TECHNICAL PROJECTS

➢ CarboNexFarm | Carbon Credit Trading Platform

June 2024

- **Overview**: MERN stack-based platform enabling carbon credit trading between farmers and companies.
- **Technologies**: MongoDB, Express.js, React.js, Node.js, Python (ML).
- **Key Features:**
  - Developed ML models to calculate carbon points from farming data.
  - Implemented a secure login system for user account and transaction management.
  - Designed an interactive interface for farming data input and credit management.
  - Built a scalable marketplace for real-time carbon credit trading.
- **Impact**: Promoted sustainable farming and simplified carbon credit trading.

➢ SkillUp | Notes Selling Platform

July 2024

- **Overview**: MERN stack-based platform enabling teachers to sell notes and students to purchase academic materials.
- **Technologies:** MongoDB, Express.js, React.js, Node.js.
- **Key Features:**
  - Implemented secure authentication and payment functionalities.
  - Designed a fully responsive user interface compatible with all devices.
  - Streamlined account creation and note upload processes for teachers.
  - Enhanced user experience with a simple purchasing workflow.
- **Impact**: Improved accessibility to academic resources, benefiting educators and learners.

➢ Newsio | Social Media Platform for News Sharing

August 2024

- **Overview**: Built a platform for user-generated news sharing and engagement across various domains.
- **Technologies:** MongoDB, Express.js, React.js, Node.js, REST APIs.
- **Key Features:**
    - Developed an algorithm for domain-specific news prioritization.
    - Integrated APIs for interactive features like jokes.
    - Created responsive designs for cross-device compatibility.
- **Impact**: Fostered an engaging platform for real-time, user-specific news interaction.

➢ FPway | Freelancer-Employer Connection Platform

October 2024

- **Overview**: Platform matching freelancers with employers for project-based opportunities.
- **Technologies:** MongoDB, Express.js, React.js, Node.js.
- **Key Features:**
    - Enabled employers to post projects and review freelancer applications.
    - Facilitated communication through integrated contact-sharing features.
    - Designed a user-friendly interface to streamline the connection process.
- **Impact:** Enhanced collaboration by efficiently connecting talent with opportunities.

SKILLS & AREA OF INTERSTS

- **Programming:** C, C++, Java, JavaScript.
- **Web Development:** HTML, CSS, React.js, Node.js, Express.js, MongoDB.
- **Databases:** SQL, MongoDB.
- **Areas of Interest:** Full-Stack Development, Software Development, Database Management, Software Testing

RESEARCH PAPER

- **"Arduino Uno Programming Based New Five Level Inverter for Photovoltaic Applications"**
    - Published in IEEE (November 2023)
    - **Contribution:** Developed C code to convert sine waves into square waves.
- **"NearBySell: A Novel Approach to Localized E-Commerce with Focus on Seller-Customer Interaction and Enhanced Local Retail Network"**
    - Published in IEEE (June 2024)
    - **Contribution:** Designed a direct selling platform for farmers, reducing dependency on intermediaries.
- **"CarboNexFarm: Empowering Farmers and Companies Through AI-Driven Carbon Credit Trading"**
    - Published in IEEE (December 2024)
    - **Contribution:** Developed a system for carbon credit calculation and trading.
